EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with James E. Bradley on May 26, 2004.

The application has been amended as follows:

In the claims,

In claim 10, delete lines 14-18 (step (f) in its entirety) and replace with

--(f) curing the layers of fabric on the base tool by overlaying the elastomeric member on the layers of fabric, enclosing the base tool, the elastomeric member and the layers of fabric within a vacuum bag, and withdrawing air from within the bag, air pressure outside of the bag compacting the layers of fabric, and then applying heat and additional pressure to the layers of fabric.--

In claim 12, lines 3-4, delete "to form the resilient elastomeric lobed over press member,".

In claim 12, line 5, delete "the lobes" and insert -- a lobe from the elastomeric member--.

2. The following is an examiner's statement of reasons for allowance:

Application/Control Number: 09/998,890

Art Unit: 1733

Independent claims 6, 7, 14, 15, 18 are allowed for the reasons as set forth in paragraphs 26-28 of the previous Office Action filed December 18, 2003.

As to claim 1, no prior art was found to show or suggest a method of fabricating a corrugated laminate panel by pressing fabric into grooves of a base tool with a roller where the roller has a lobed member wrapped around the shaft and releasably secured at opposing ends of the lobed member in the claimed environment.

As to claim 10, no prior art was found to show or suggest a method of fabricating a corrugated laminate panel by installing fabric onto a base tool with a roller where the layers of fabric are cured by overlaying the elastomeric member (of the roller) on the layers of fabric and enclosing within a vacuum bag in the claimed environment.

 The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The references Magnani, Rooksby, and Schramm all disclose examples of forming corrugated members in general.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gladys J Piazza Corcoran whose telephone number is
